

# Astute Range Explained

**Area Network Tower**

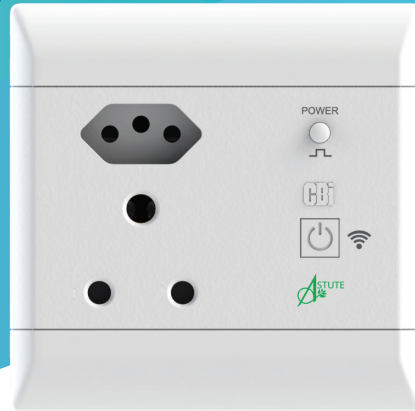

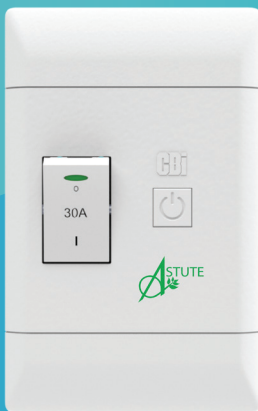

**Wi-Fi Router**

**Smartphone**

**Astute Devices**

## How it all works

- The Astute device connects to the Wi-Fi router
- The Wi-Fi router connects the Astute device to the CBI Cloud
- The CBI Cloud submits the message from your smartphone to the Astute device when not on the same network
- The area network tower allows for device control from anywhere via your smartphone
